

The University environment drives...

your choice of software, configuration, scaffolding, and usage...

to create specific faculty/student impacts.

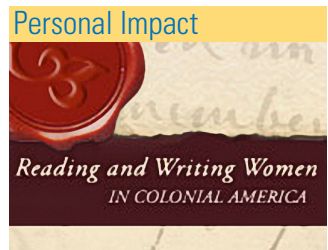

Engagement Models:

textual explication

community activism

historical connection

commons-based peer production

The Wild, Wild Wiki: Unsettling the Frontiers of Cyberspace

This model locates wikis within the university environment and describes their social and pedagogical impacts. It is drawn from the essay "Wiki Justice, Social Ergonomics, and Ethical Collaboration" by Jonah Bossewitch, John Frankfurt, and Alexander Gail Sherman in *The Wild, Wild Wiki: Unsettling the Frontiers of Cyberspace*, edited by Bob Cummings and Matt Barton (University of Michigan Press, 2007).
